Ecomodulation 2027

Criterion	Material / Packaging	Adjustment to service fee	Criterion definition
Multi-material packaging	All	+10%	Packaging made of two or more different materials that form part of the weight of the main material and cannot be separated by hand, unless one represents an insignificant part and, in no case, exceeds 5% of the total mass, excluding labels, varnishes, paints, inks, adhesives and lacquers.
≥50% recycled material	Plastics	-3%	Plastic packaging with recycled material content equal to or above 50%.
Recycling-disruptive material	PVC	+10%	Packaging containing PVC.

Ecomodulation percentages are applied to the corresponding service fee.
